

**DEMCA Quality Improvement
Clinical Indicators**

Agency: _____

Title: Medication Administration

Standard: Paramedics may administer medications as permitted by DEMCA protocols in specific pre hospital patients

Reference: This standard may be referenced by the DEMCA medication administration protocols

Specific Clinical Indicators	Total Number Patients Given Medications	Number with this action	Percent	Threshold
1. The medication given is correct for patient's condition.				95%
2. The correct dose is given.				95%
3. The correct concentration is used.				95%
4. The correct route is used.				95%
5. The correct frequency is used.				95%
6. BP prior to NTG administration				95%
7. Any deviations from Standard of Care				95%

Methods: Data collected through retrospective rur
Calculation of percent: (Number success/total number)x100

Screen: Review until 10% of all medication runs are entered, if 10% less than 50, increase to 50 charts to meet review criteria.

Audit due: _____ **Audit completed:** _____ **Summary Report date:** _____

Document reasons if threshold is not met, provide plan for remediation to correct the issues.
