PURPOSE

EMSystem is a web based communications and resource management system designed to provide EMS agencies with the status of Detroit East Medical Control Authority (DEMCA) Emergency Departments and their ability to receive patients. EMSystem is utilized on a daily basis for updated information and in the event of mass casualty situations.

PROTOCOL

Pre-Hospital Providers

Pre-Hospital provider agencies shall routinely monitor status of DEMCA participating facilities with EMSystem.

Participating Facilities

DEMCA participating facilities shall be responsible for updating status information on EMSystem by 10:00 A.M. each day or more often as status changes.

EMSystem can be accessed with the agency's log-in and password at:

<http://emresource.emsystem.com/login.htm>
